

BIOSECURITY CHECKLIST FOR ACCOMMODATION

We have new biosecurity requirements for guests and ask that you help us keep Rotoroa pest free. This checklist MUST be completed prior to your departure for Rotoroa.

Please read this biosecurity checklist and ensure *each member* of your party has complied with the luggage requirements specified.

Bring this completed form with you; it will be collected upon arrival at Rotoroa. Only one form is required per party.

If you have any questions, please see: www.rotoroa.org.nz/conservation/biosecurity-information.aspx

Guest party name and booking reference:		
Intended date of visit:		
Item	Action	Completed <small>(please tick)</small>
Packs and bags	I have emptied my pack/bag, cleaned it out and checked it to ensure all seams and side pockets are free of seeds and dirt. <i>Seeds and insects love the bottoms and seams of packs or bags</i>	
	My pack/bag is clean, in good condition and secure against stowaways such as mice. <i>If you can poke a pen through any hole it's not mouse proof</i>	
Food	I have packed my food into sealed containers <i>such as fish or chilly bins and sturdy cardboard boxes. Banana boxes or any box with holes in it is a biosecurity risk and prohibited</i>	
Fishing gear	I have checked and cleaned all my gear and have it packed in a secure container with a lip or a zip. I will take all my left over bait and rubbish home. <i>Bait can attract rodents ashore. Bait bags can trap wildlife such as seabirds.</i>	
Footwear	I have cleaned my boots and shoes so no seeds and soil is present. <i>Remember to check the tread and around the laces</i>	
Clothing	I have inspected my socks, raincoat and other high risk items for seeds? <i>Check any velcro parts or inside seams</i>	
Boats, helicopters, barges	I have inspected my boat for rodent signs and insects and am confident that there are no stowaways on board	
I and my party have run through this checklist prior to packing and are confident there are no biosecurity risks.
